

metis.

a user-centered inspection assistant
for data collection

metis. by team Baguette

Data is valuable...

diagnosis
predictive maintenance
product engineering
customer experience

...if you have it

A fully mobile solution?

Or a slightly different approach?

- Focus on the user
- Facilitate the the operator work without upsetting their way of doing it
- Trust the operator expertise

Have you ever tried to measure a bottom roller? Well, I did, and that's not easy.
Taking a picture of that part is even harder.

Let's measure the tools!

demo time

demo part 1

https://www.youtube.com/shorts/OxV_SV84fuk

demo part 2

<https://www.youtube.com/shorts/Ux-IDFVvYNk>

demo part 3

<https://www.youtube.com/shorts/bQQjrBjhrvI>

It starts tomorrow

- 1 No major change in the process
- 2 Multi purpose and flexible
- 3 Low conception & maintenance cost

Next steps...

Collected data

Machine Learning
algorithms

Improved wear tracking
Early diagnosis
Predictive maintenance
